CLIENT DEPLOYMENT SERVICES

The deployment of new client devices should be an exciting time for any organisation, however the reality is often very different with a range of requirements to cater for.

These include: arranging delivery, storage, software builds, packaging disposal, installation to desk, managing downtime, organising the disposal of the legacy equipment to list just a few.

Academia offers a flexible client deployment service that can be tailored to best meet the needs of your organisation, offering a hassle free client roll out.

RANGE OF BENEFITS TO YOUR ORGANISATION

- **Free up staff resources.**
- **Simplify the deployment process.**
- **No storage headaches - new and legacy equipment.**
- **Fast deployment with minimal downtime.**
- **Legacy equipment removed from site as part of the deployment process.**
- **All packaging removed from site.**
- **Asset register provided, containing serial number, asset tag and device specification.**
- **Installation can be called off in batches from storage.**
- **Compliance with environmental and data standards.**
- **Reduced acquisition costs through the resale of legacy assets.**
