

ITAD and Recycle Services

We've made IT Asset Disposition services (ITAD) simple, secure and sustainable for businesses and institutions across the UK.

Our processes are seamless, fully integrated and backed up by our customer service guarantee. Are you looking for a sustainable and a zero-landfill policy for all your devices?

Why Academia?

Here's the benefits of our ITAD services:

- End-to-end IT asset management from optimisation to recycling
- Fair market value offered for all equipment returned
- Sustainability-first approach with zero landfill promise with all kit either recycled, re-used or re-furbished
- All data bearing devices are managed in accordance with Data Protection regulations and customers are provided with certificates for audit/compliance requirements
- CO2 report provided to show amount of emissions saved
- Quick turnaround; most assets can be processed in under 4 weeks
- Dedicated account management
- Fully certified and accredited with WEEE, Cyber Essentials, ISO27001, ISO14001, IS18001, ISO9001, ADISA Standard 8.0, ICO and Blancco

Academia ITAD services

Secure IT management & asset disposal

Circular ITAD solution for your end-of-life IT assets including laptops, desktops, mobile phones, servers and networking equipment, including rebates for assets with resale value.

End of life management and disposal

When your IT assets are no longer fit for purpose and there is no resale value, why not consider secure recycling. We operate a zero-landfill policy while ensuring all data is destroyed and your assets are recycled in the most environmentally friendly way.

Data integrity and erasure

We partner with Blancco for the secure erasure of data holding assets. Also included is your Data Impact Assurance Level (DIAL) to ensure your assets are being handled with the due diligence you would expect.

Asset optimisation

We offer a range of optimisation services including image configuration, hardware upgrades (such as hard drives), along with repairs and maintenance.

Academia ITAD process

We collect all your PCs, laptops, tablets, servers, phones and more from any location in mainland UK with GPS tracked vehicles.

Once received, your devices are fully tested and graded to ensure you receive fair market value. Plus, we will send a detailed inventory with your testing & grading results.

Devices are sanitised of data and you will be provided with a certificate of data destruction.

Once a final rebate has been agreed, we will send you cashback for your devices. You will also have the option to purchase from us or we can donate to a charity on your behalf.

Our goal is to protect the planet and that's why we operate a zero-land fill policy and ensure all devices are retired and reused.

"University for the Creative Arts (UCA) started to utilise Academia Lifecycle Services as part of our desktop replacement programme. One of the main benefits for UCA was Academia's ability to deliver new computers to desk, whilst taking away the packaging and old/retired computers. This value added service has been crucial at a time when internal resources are stretched. Other benefits included; certificates for data erasure/destruction and receiving better residual valuations than some alternative WEEE disposal companies. We would recommend Academia to others."

- James Tempest | University for the Creative Arts

Sustainability Matters

Are you tracking your carbon emissions? As part of our service, we will provide you with a report showing the amount of CO2 saved with Academia's reuse, redeploy and recycling strategy, helping you achieve your reduction goals.

We aim to maximise asset usage with reuse in the organisation, alternatively we resell devices in the UK once the data has been removed securely. This means your IT assets circulate for as long as possible whilst giving you piece of mind that your organisation is making an active difference to a global challenge.

See how Academia is committed to achieving Net Zero by reading our Carbon Reduction Plan.
