

Preparing for success | Discovery workshop

Staying ahead of the technology curve can feel like an uphill battle. Balancing needs, user demands and deployment challenges is a daily struggle that we understand all too well.

Our Discovery workshop takes a high level, strategic review of your environment and recommends the best solutions to solve your technology challenges with the aim to provide the best outcomes for your business or institution.

Who is it for?

Ideal for IT leaders looking for expert guidance to provide an in-depth assessment of their environment. **Some of our most popular Discovery workshops cover:**

- IT management controls, process and policies for mobile devices (multi-platform)
- Network, infrastructure, storage and identity management
- Cyber security and endpoint management
- Software asset management
- Technology challenges including the user experience, integrations and deployments

What's the benefit?

- ✓ Unbiased evaluation of your IT infrastructure, device management, and security.
- ✓ Gain insight's from industry experts.
- ✓ Identify risk factors, key architecture needs, and workflow improvements.
- ✓ Boost user enablement and productivity
- ✓ Advice for future-proofing your environment using best practices.
- ✓ Tailored roadmap and value statement

The agenda for the day:

	Understanding your business objectives
	Identifying your technology challenges
	Strategy review
	Evaluate technology controls and policies
	Review process and costs
