Introducing Jamf Pro Health Checks

Maximise the impact and efficiency of Jamf Pro for your IT admins and end-users with our specialised Jamf Health Check.

Designed to fine-tune your Jamf Pro (whether onpremise or cloud-based), our Health Check takes a deep dive into your estate and examines the health of your Jamf Pro environment.

Here's some reasons why you might benefit from a Health Check:

- Peak performance optimisation
- Adherence to best practices
- Diagnostic troubleshooting
- Compliance standards
- Enhancing user experience & customisation
- Receiving advice & recommendations

Our Approach

The Jamf Pro Health Check is tailored to your set-up and looks to pinpoint and resolve inefficiencies, drive best practices whilst aligning with business goals and providing IT admins a host of actionable insights.

We will conduct a comprehensive audit of your estate to ensure your platform is in top-notch shape with everything set-up and being used as efficiently as possible.

What you get

- Comprehensive review of your Jamf Pro environment
- Analysis of existing policies and configurations benchmarked against industry standards
- Evaluation of key management settings and features
- Identification and insights of technical and UX bottlenecks
- Comprehensive report of your Jamf Pro server health including recommendations for improvements

What's the benefit to you

- Boost effective use of Jamf Pro
- Keep abreast of new features
- Achieve best practice and compliance
- Drive best possible user experience

What next?
